After a serious work injury I had to retire much earlier than expected. As a result my income has drastically lowered and I find it extremely difficult to cover anything besides the absolute necessities. Thankfully, I receive housing assistance or I'd have no place to live!  Allowed a friend to use my credit card for emergencies and she ran up debt of \$45000 which I am struggling to keep payments on  Amazing survey, unlike any other I have taken in last twenty years.  At the moment, the high inflation is making it very difficult to be in a good financial situation.  Bad business decisions.
